Office Action Summary

Application No.

10/553,703

Applicant(s)

FIKES ET AL.

Examiner

MINH-TAM DAVIS

Art Unit

1642

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 December 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 15-40 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 15-40 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/CDC)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claim(s) 15, 22-26, 29-31, 33, 36, drawn to a single combination of the peptides cited in claim 15, and a method for treating breast cancer, using said combination.

Group B, claim(s) 15-26, 29-31, drawn to a combination of the peptides cited in claim 15, which combination is different from the combination of Group A. Each combination constitutes a single, distinct invention.

Group C, claims 27-28, a combination of the peptides cited in claim 15 and further comprising a combination of antigen presenting cells presenting said peptides. Each combination of peptides and antigen presenting cells constitutes a single, distinct invention.

Group D, claim 32, drawn to a combination of nucleic acids encoding the peptides cited in claim 32. Each combination of nucleic acids constitutes a single, distinct invention.

Group E, claims 33, 36, drawn to a method of treating a cancer cited in claim 36, and which is different from breast cancer, using the combination of peptides of group A. A method for treating each cancer constitutes a single, distinct invention.

Group F, claims 33, 36, drawn to a method for treating a cancer cited in claim 36, using a combination of peptides, which is different from the combination of peptides of group A. A method for treating each cancer cited in claim 36, using each combination of peptides constitutes a single, distinct invention.

Group G, claims 33-36, drawn to a method for preventing a cancer, by delaying recurrence of cancer or preventing metastasis of primary tumor, using a combination of the peptides of group A. A method for preventing each cancer cited in claim 36 constitutes a single, distinct invention.

Group H, claims 33-36, drawn to a method for preventing a cancer, by delaying recurrence of cancer or preventing metastasis of primary tumor, using a combination of the peptides cited in claim 15, which combination is different from the combination of peptides of group A. A method for preventing each cancer cited in claim 36, using each combination of peptides cited in claim 15 constitutes a single, distinct invention.

Group K, claims 37, 40, drawn to a method for treating a cancer cited in claim 36, using a combination of nucleic acids encoding the peptides cited in claim 32. A method for treating each cancer cited in claim 36, using each combination of nucleic acids constitutes a single, distinct invention.

Group L, claims 37-40, drawn to a method for preventing cancer, by delaying recurrence of cancer or preventing metastasis of primary tumor, using a combination of the nucleic acids encoding the peptides cited in claim 32. A method for preventing each cancer cited in claim 36, using each combination of nucleic acids constitutes a single, distinct invention.

The inventions are distinct, each from the other because of the following reasons:

A national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. When claims to different categories are present in the application, the claims will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories: (1) A product and a process specially adapted for the manufacture of said product; or (2) A product and a process of use of said product; or (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or (4) A process and an apparatus or means specifically designed for carrying out the said process; or (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R. 1.475(b) and (d). Group I will be the main invention. After that, all other products and methods will be broken out as separate groups (see 37 CFR 1.475(d).)

Group A, claims 15, 22-26, 29-31, 33-34, 36 forms a single general inventive concept.

Groups B-D do not share the same technical feature of group A, because the composition of groups B-D do not share a common structure or property with of the combination of peptides group A.

Groups E, G are additional use of the combination of peptides of group A.

Groups F, H-L do not share the same technical feature of group A, because the methods of groups F, H-L do not use the combination of peptides of group A.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH-TAM DAVIS whose telephone number is 571-272-0830. The examiner can normally be reached on 9:00 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, LARRY HELMS can be reached on 571-272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

MINH TAM DAVIS
